DETAILED ACTION

1. Applicant is required to insert on Page 1, line 1, --This application is a 371 of PCT/AU00/01131, filed September 18, 2000.--

2. Claims 4-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can depend from another multiply dependent claim. See MPEP § 608.01(n).

Accordingly, the claims 4-11 have not been further treated on the merits.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Deiringer.

Deiringer teaches a method of sorting non-pet materials from a waste stream, dividing the pet plastic containers into flakes, washing the flakes in a hot aqueous alkaline material to remove absorbed

containments; drying the flakes, melting flakes and extruding under vacuum to form strands that are then subsequently pelletized which fully anticipates applicant's claims. [Note Figure 1]

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Nichols et al..

Nichols et al. teach applicant's invention as claimed. Nichols et al. teach a method of sorting non-pet materials from a waste stream, dividing the pet plastic containers into flakes, washing the flakes in a hot aqueous alkaline material to remove absorbed containments; drying the flakes, melting flakes and extruding under vacuum to form strands that are then subsequently pelletized. [Note Figures 1 and 2]
